

CAE LearningSpace Experience

Intelligent Recording,
Easy Debriefing

Record, debrief, improve performance

CAE LearningSpace Experience is a simplified solution for simulation video capture and debrief. CAE LearningSpace Experience is easily adaptable within a fast-paced healthcare environment where standards and practices are rapidly evolving. The user-friendly system allows clinical teams to practice new safety protocols and gain instant feedback.

Expect more with CAE LearningSpace Experience.

MASTER DISTRIBUTOR : WESTERN & SOUTHERN INDIA

Experience a simplified video-enhanced debriefing solution

The screenshot displays the CAE LearningSpace Experience interface. It features a main video area with four HD windows showing simulation scenes. A control bar at the bottom includes a 'Health Assessment' section with a timer at 00:07:26 and buttons for 'Room', 'Simulator', and 'Facilitator'. On the right, an 'Annotations' panel lists events such as 'Pedal pulse checked - identifies absence of pulse on right foot' and 'Good communication, eye contact held'. A 'Sim Log' section is also visible.

Large HD windows

Quickly and easily annotate

3-way intercom (room, instructor, simulator)

Real time patient simulator data

CAE LearningSpace Experience is a solution designed for ease of use. Whether you need to watch, debrief, search or analyze, it's there, it's clear and it's simple.

Record and Debrief

Stunning HD recording and playback for convenient debriefing, anywhere

Simple Video Sharing

Easily share video recordings with your participants

Center Monitoring

Include names, dates, physiological data, events and more

Built-in Intercom

Speak in to your training environment with a click of a button

Annotations

Annotate on the fly or after the recorded session. Preset annotations and customizable bookmarks available

How can CAE LearningSpace Experience improve your simulation or hospital-based training and debrief?
